Dictionary is ideal for both native English speakers and English learners or people studying the English language. The dictionary definitions are stored locally, and because it's ad-free there's no need for a network connection. The home page contains a randomly selected word cloud which will pique your curiosity and help you improve your vocabulary, while the search box allows you to find specific words easily. As you type, Dictionary homes in on the word you are looking for.

Then you can follow the links in the definition page to get more word definitions. Wildcard characters can be used to help with word games like crosswords and scrabble where only some of the letters are known, or you have to find an anagram, or with spelling. Definitions include synonyms and antonyms which allows the dictionary to also serve as a thesaurus. The speech function helps provide the correct pronunciation.

You can see your word history and revisit definitions, or make your own list of favourite words to help build up your vocabulary. It also works well if you only have an intermittent network connection because the definitions are stored offline, locally on the device. And we managed to keep data offline without needing a massive app download. There is also a word of the day" with our pick of the most interesting and entertaining words in the English language.
