We shall discover the requirements for this for you to download Simcity Buildit PC on MAC or windows laptop without much headache. SimCity BuildIt is an amazing city-building and planning game quite similar to The Sims Freeplay which we have already reviewed. The game has impressive visuals and somewhat aggressive monetization system based on the freemium model.

Factories create building block materials that are used as the foundation for building more advanced items, all of which are used to upgrade residences. Residences award money, population, and experience.

In-game money is used to build and upgrade factories, stores, and public facilities. Population and experience go towards separate systems for unlocking various new buildings to construct as you play.

Later levels allow you to apply those crafting materials to other objectives, such as satisfying shipping orders to get special keys that can be used to construct special buildings. While SimCity BuildIt's gameplay obviously centers around the crafting mechanic, there are lots of similarities to the classic SimCity. Fire and police coverage become essential the further you advance in the game, while placement of those departments become important to try and get the most out of your money for each building placed. The same goes for parks, cultural landmarks, and specialty buildings such as transportation and education departments.

Power, water, and sewage also become important parts of the game as keeping them up to date allow you to build more residences and expand your city. Timers are pretty reasonable. Money shortage is a constant problem but SimCity BuildIt throws a few ways to earn more money, such as selling your resources to the AI (not worth it), selling them to other players and, of course, saving them to upgrade

residences and earning money the traditional way.

The random nature of acquiring special items for inventory and land expansion can be a bit frustrating but again, you can always purchase them from other players. However, there are some buildings and items that you can buy only by spending some real money through in-app purchases, which is a disappointment. SimCity BuildIt's strongest point is its amazing visuals and controls. With a full 3D view of your city, you can view your city from a 360-degree angle.

You can zoom in and out to view all the clear details of the game like cars, people on the streets and even your gardens. Although you are not allowed to buy some special items using your in-game money, SimCity BuildIt has enough content and items that will keep you busy and entertained for hours and days. This is surely one of the best city-planning and building games out there. You could also try out other similar games like Fallout Shelter, Jurassic World or City Island 4.
